

'Snakes and Tigers': Drugs for Heart Failure

Speaker: Dr Ian Beeton

Thursday 5th October. 7.30pm. T S Dianthus, Goldsworth Park

Snakes and Tigers? What can they possibly have in common with Cardiological procedures and medicines?

Well, we are about to find out from Dr Ian Beeton who will be opening our new season of speakers at HeartBeat Support Woking.

Dr Beeton is a Consultant Cardiologist and General Physician at Ashford and St Peter's Hospitals NHS Foundation Trust.

His special interests (*apart from skin diving!*) are General Cardiology, Cardiac Imaging (cardiac MRI and echocardiography), Heart Failure, Pacing (biventricular pacing and implantable defibrillators). He is the clinical lead for ICDC Surrey, which provides on-going support and education for families and patients requiring complex pacing procedures.

This should be a most interesting and eye-opening start to our year.
