

HEALTH AND SAFETY

Thursday 6th June. 7.30 pm. T S Dianthus, Goldsworth Park

Nanny state gone mad or enlightened care?

Our speaker, Nick Cook, will ask you to decide for yourself as you fasten your seat belt and take a roller coaster ride through the past, present and precarious future of 'elf & safe T.

We will consider the health hazards from those faced by stone-age flint axe makers to modern dangers such as the perils of simply washing your hands, sitting or even conker smashing and the hidden hazards you inhale while flying in today's modern airliners.

While your final views of this controversial subject are of course 'entirely your own risk', this talk will hopefully help to inform those opinions.
